

# Test Proof: Bug #1778 Fix

**Date:** 2026-01-06 **Pass/Fail:** PASS **Bug ID:** #1778 **Epic:** User Registration & Authentication **Description:** Password fields on Login and Signup pages missing visibility toggle (Eye icon).

## Test Environment

- **Frontend:** Next.js (Port 3000)

## Test Case 1: Password Visibility Toggle

### Description

Verify that the user can toggle password visibility using the eye icon on both Login and Signup pages.

### Steps

1. The user navigated to the Login page (/login).
2. Entered “secret123” in the password field.
3. Observed the Eye icon positioned inside the field.
4. Clicked the Eye icon.
5. Verified the password text became visible.
6. The user navigated to the Signup page (/signup).
7. Repeated the process for “Password” and “Confirm Password” fields.

### Expected Result

- Eye icon should be visible inside the input field.
- Clicking the icon should toggle between hidden (dots) and visible (text) modes.

### Actual Result

- Eye icons are correctly positioned inside the fields.
- Toggling functionality works as expected.

### Evidence

Verified (Eye Icon Inside Field):
