Bug Verification Report

Date: 2026-01-09 **Bug ID:** #1786 **Title:** Relationship dropdown UI visibility issue
Status: Fixed

Issue Description

Dropdown options in the "Add New Contact" modal and "Profile Settings" were appearing with white text on a white (or default) background, making them unreadable in the dark-themed application. **Epic:** #1598 Contact Management **User Story:** #1646 Add new contact

Fix Implementation

Aligned the UI of <select> options with the application's dark mode theme. 1. **Code Changes:** * File: frontend/src/components/ContactFormModal.jsx * **File:** frontend/src/components/dashboard/ProfilePage.js * **Change:** Added className="bg-[#181820] text-white" to appropriate <option> elements within the dropdowns. * **Affected Dropdowns:** "Relationship", "Gender" (Contacts), "Timezone", "Upgrade Plan", "Payment Method" (Profile).

2. **Logic:**
   - By explicitly setting the background color of the <option> elements, we override the browser's default behavior (which often renders white backgrounds), ensuring the white text is readable against a dark background.

Verification Steps

Manual Verification: 1. **Add Contact Modal:** * Action: Open "Add Contact" modal. Click "Relationship" dropdown. * Expected: Options (Friend, Family, etc.) are visible with white text on dark background. * Actual: Options are clearly visible.

2. **Profile Page:**
   - Action: Go to Profile. Select "Personal Info" tab. Click "Timezone" dropdown.
   - Action: Select "Subscription" tab. Click "Upgrade To Plan" dropdown.
   - Expected: Options are readable (White on Dark).
   - Actual: Options are readable.

Conclusion

The visibility issue is resolved by enforcing dark background styling on dropdown options.
