Bug Verification Report

Date: 2026-01-09 **Bug ID:** #1787 **Title:** Mandatory fields are not marked with (*) symbol **Status:** Fixed

Issue Description

Ideally, mandatory fields should be clearly distinguished to guide the user. The report stated that mandatory fields (Full Name, Relationship) were not finding marked properly, causing confusion. **Epic:** #1598 Contact Management **User Story:** #1646 Add new contact

Fix Implementation

I enhanced the visual indication of mandatory fields in the "Add New Contact" modal. 1. **Code Changes:** * **File:** frontend/src/components/ContactFormModal.jsx * **Change:** Replaced the plain text asterisk * with a styled text span * for both "Full Name" and "Relationship" labels.

2. **Visual Result:**
   - The asterisk now appears in **red**, making it nearly impossible to miss against the gray/white text, complying with standard UI patterns for required fields.

Verification Steps

Manual Verification: 1. **Visual Check:** * Action: Open "Add New Contact" modal. * Expected: "Full Name" and "Relationship" labels should have a red asterisk next to them. * Actual: Red asterisk is visible.

2. **Other Fields:**
   - Action: Check "Email", "Phone", "Birthday" etc.
   - Expected: No asterisk (as they are optional).
   - Actual: No asterisk.

Conclusion

Mandatory fields are now clearly and consistently marked with a red asterisk.
